

PATENT RIGHTS ASSIGNMENT AGREEMENT

This Patent Rights Assignment Agreement ("Agreement") is made as of January 22, 2026 (the "Effective Date"), by and between Saul Marc Kenton ("Assignor"), and RWAP Technologies Inc, a Profit Corporation formed or qualified under the laws of Wyoming on October 15, 2025, with Wyoming entity identification number 2025-001792072 ("Assignee").

RECITALS

A. Assignor has been identified as an inventor (or joint inventor) in connection with the invention titled "Systems and Methods for Dual Chain Synchronization of Digital Property Tokens" (the "Invention").

B. The Invention is described in (i) U.S. Patent Application identified in Exhibit A and (ii) the PCT international application identified in Exhibit A (collectively, the "Applications").

C. Assignor desires to assign to Assignee, and Assignee desires to acquire from Assignor, all of Assignor's right, title, and interest in and to the Invention and the Applications, including any patents issuing therefrom and related rights, on the terms set forth herein.

AGREEMENT

1. Assignment.

For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby sells, assigns, transfers, and conveys to Assignee all right, title, and interest of Assignor, whether now owned or hereafter acquired, in and to: (a) the Invention; (b) the Applications; (c) any and all patents and patent applications claiming priority to, derived from, or otherwise related to the Applications, including any continuations, divisionals, continuations-in-part, substitutions, reissues, reexaminations, and extensions (to the extent applicable); (d) all foreign and international counterparts of any of the foregoing; and (e) all causes of action, rights to sue (including for past, present, and future infringement), and rights to recover damages and other relief for infringement or misappropriation of the foregoing rights, to the extent such rights are assignable.

2. Further Assurances; Cooperation.

Assignor shall execute and deliver to Assignee, and shall cause to be executed and delivered, any and all documents, and shall do and perform (or cause to be done and performed) all acts, as Assignee may reasonably request to perfect, evidence, record, prosecute, maintain, enforce, or defend Assignee's rights in and to the rights assigned under this Agreement. This includes, without limitation, executing declarations, oaths, assignments, powers of attorney, and other documents reasonably necessary for patent prosecution, recordation, or enforcement in any jurisdiction.

3. Appointment of Attorney-in-Fact (Limited).

If Assignor fails to execute any document reasonably required under Section 2 within ten (10) business days after written request by Assignee, Assignor hereby irrevocably appoints Assignee and its duly authorized officers as Assignor's attorney-in-fact solely for the purpose of executing such document(s) on Assignor's behalf to effectuate and perfect the assignment intended by this Agreement. This power of attorney is coupled with an interest and shall survive the disability or incapacity of Assignor.

4. No License Back; Reservation of Rights.

Except as may be set forth in a separate written agreement signed by Assignee, Assignor retains no license or other rights in the Invention or Applications, and all rights are reserved exclusively to Assignee.

5. Representations.

Assignor represents that Assignor has not previously assigned, transferred, pledged, or otherwise conveyed any rights in the Invention or the Applications inconsistent with this Agreement, and that Assignor has the right to enter into this Agreement.

6. Governing Law.

This Agreement shall be governed by and construed in accordance with the laws of the State of Wyoming, without regard to its conflicts of laws principles, except to the extent preempted by applicable federal law relating to patents.

7. Miscellaneous.

This Agreement is binding upon and shall inure to the benefit of the parties and their respective successors and permitted assigns. This Agreement may be executed in counterparts (including by electronic signature), each of which shall be deemed an original and all of which together shall constitute one instrument. This Agreement constitutes the entire agreement between the parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements or understandings relating thereto.
